Dart Development Plans New Spec Facility

Oakwood Executive Park Building to Break Ground in June

Dart Development plans to construct a 45,500-square-foot flex building on English Oak Drive in Lansing, MI, the company said last week.

The spec facility will consist of four suites starting at about 10,100 square feet. Each unit would include a truck dock, a grade-level door, office space and conference and break rooms. The property would cover two parcels totaling about 3.7 acres in the Oakwood Executive Park.

Dart Development plans to break ground by early June, with completion expected in November. Steve Mills and Marsha Zimmerman of Dart are handling leasing for the proposed building.
